

## Research Day on Neural Circuits of Pain

**Date:** Friday June, 28<sup>th</sup>, 2019

**Venue:** Mathematikon, 5th floor conference room, INF 205,  
Library building D-69120, Heidelberg

### Program of the day

- 09:00-09:45**            **Frank Kirchhoff (Project A09N):** Transmitter receptors in neuron-glia signaling
- 09:45 -10:15**           **Manuela Simonetti (Project A09N):** Plexin-B2-Semaphorin 4C signaling in chronic pain and pathological fear
- 10:15-10:45**           **Heike Tost (Project B04):** Prospects of real-life data acquisitions for psychiatric neuroscience and pain research
- 10:45-11:15**           *Coffee break in Club room*
- 11:15-11:45**           **Rebecca Mease (Project B10):** Functional modeling of single neurons
- 11:45 -12:00**           **Jochen Apel (Heidelberg University Library):** Research Data Management and Open Science Services at Heidelberg University
- 12:00-12:30**           **Mirko Pham (Project A10N):** Neurovascular coupling in the PNS. A source for pain research?
- 12:30-14:00**           *Lunch in Club room*
